

NervSync Marketing Suite

Complete Build Prompt for Claude

Prepared for ARI Solutions Inc.
nervsync.arisolutionsinc.com

April 2026

*You are building the full marketing and growth engine for **NervSync**, an AI-powered nervous system regulation SaaS. The app is already built and deployed at `nervsync.arisolutionsinc.com`. Your job is to create every piece of marketing collateral, copy, email sequence, ad creative, and launch strategy needed to acquire cold-traffic paid subscribers at \$14.99/mo.*

Product Context

What it is: NervSync is a daily AI-powered platform that helps users regulate their nervous system through personalized breathwork, somatic exercises, vagal toning, sleep protocols, emotional fitness tracking, an AI coaching chat, structured multi-week programs, SOS emergency regulation, and deep pattern intelligence.

What it is NOT: A meditation app. A generic wellness app. A breathing timer.

Pricing

Plan	Price	Note
Monthly	\$14.99/mo	Most Popular
Annual	\$99/yr	Save 45%
Lifetime	\$199 one-time	Best Value

All plans include a 7-day free trial.

Target Audience

Health-conscious adults 25–55 who have tried meditation apps, breathwork, supplements, or HRV trackers but still feel wired, foggy, or drained. They're willing to spend on wellness but frustrated that nothing has worked long-term.

Key Differentiators vs Competitors

- AI personalization (not generic content)
- Nervous-system specific (not generic meditation)
- No hardware required (unlike Pulsetto, Apollo, etc.)
- Structured programs (not just a library)
- AI coaching chat with full user context
- SOS emergency mode (one-tap regulation)
- Clinical-grade protocols in a consumer-grade experience
- \$14.99/mo (vs \$70–100/yr for Calm/Headspace, \$350–1,500 for courses, \$149–299 for devices)

Core Features to Highlight

1. 30-second daily check-in → AI-personalized session
2. AI Coach (chat with a nervous system expert anytime)
3. 50+ protocols (breathwork, somatic, vagal toning, grounding, movement, sound, cold exposure)
4. 6 structured programs (21-Day Reset, Sleep Restoration, Burnout Recovery, Anxiety Unwinding, Parent's NS, Emotional Fitness)
5. SOS Emergency Mode (one tap to instant regulation)
6. Sleep Protocol & Tracker
7. Nervous System Journal with AI reflections
8. Weekly AI Insight Reports (pattern intelligence)
9. Glimmer tracking (positive micro-moments)
10. XP & level system

Brand Voice

Warm, knowledgeable, non-clinical, second-person. Think: your smartest friend who also happens to be a somatic therapist. Never cold, never clinical, never condescending. Use “your body” not “the body.” Use “when you feel stuck” not “when patients present with dysregulation.”

Visual Identity

Dark mode (navy `#0F172A`), electric blue (`#3B82F6`), teal (`#14B8A6`), clean, calm, premium.
The app should feel like a \$59.99/mo product priced at \$14.99/mo.

URLs

- **Site:** `https://nervsync.arisolutionsinc.com`
- **Quiz funnel:** `https://nervsync.arisolutionsinc.com/quiz`

Deliverable 1: Brand Messaging Framework

Create all of the following:

1. **Brand positioning statement** (one paragraph)
2. **Tagline options** (5 variations, each under 8 words)
3. **Value proposition** (one sentence)
4. **Elevator pitch** (30 seconds, conversational)
5. **Long-form brand story** (500 words — the “why” behind NervSync)
6. **Key messaging pillars** (3–4 pillars, each with headline + supporting copy)
7. **Tone of voice guide** (do's and don'ts with examples)
8. **Competitor positioning map** (where NervSync sits vs Calm, Headspace, Pulsetto, Othership, live NS courses)

Deliverable 2: Website Copy (All Pages)

Write production-ready copy for every marketing page.

Landing Page

- Hero headline + subhead + CTA
- Problem section (3 paragraphs)
- “How it works” (3 steps)
- Feature showcase (all 10 features, each with headline + 2-line description)
- Comparison table (NervSync vs 4 competitors)
- Social proof section (6 placeholder testimonials — realistic, specific, varied demographics)
- Value anchor (“Everything included for less than...”)
- FAQ (8 questions with answers)
- Final CTA section
- Footer disclaimer

Quiz Funnel Copy

- Intro screen copy
- 5 question screens (questions already built — write framing copy)
- Result page copy for each of the 5 nervous system states:

State	Headline
Fight/Flight	“Your System Is Stuck in Overdrive”
Freeze	“Your System Has Hit the Brakes”
Fawn	“Your System Is in People-Pleasing Mode”
Dorsal Collapse	“Your System Is in Conservation Mode”

Ventral Vagal	"Your System Is Well-Regulated"
---------------	---------------------------------

Each result: 3 paragraphs of description, "what this means" section, "how NervSync helps" section, email capture CTA.

Pricing Page

- Headline + subhead
- Plan descriptions with feature lists
- Value anchoring copy
- FAQ specific to pricing/billing
- Guarantee/cancellation copy

Deliverable 3: Email Sequences

Write complete email sequences (subject line + full body for each).

Welcome/Onboarding Sequence (7 emails over 7 days)

Day	Subject/Theme
Day 0	Welcome + how to do your first check-in
Day 1	"Your nervous system has a language — here's how to read it"
Day 2	The science behind what we do (polyvagal theory, simplified)
Day 3	Feature spotlight — meet your AI Coach
Day 4	"The one exercise that changes everything" (physiological sigh)
Day 5	Social proof + testimonials
Day 6	Trial ending tomorrow — what you'll lose
Day 7	Trial ended — last chance to subscribe (urgency)

Quiz Completion Sequence (5 emails)

For people who took the quiz but didn't sign up:

Timing	Theme
Immediately	Your results + "Here's what we'd build for you"
Day 1	Education about their specific state
Day 3	"3 things you can do right now" (free value)
Day 5	Feature spotlight relevant to their state
Day 7	Final CTA with incentive

Re-engagement Sequence

Timing	Theme
Day 3 inactive	"Your nervous system misses you" (gentle)
Day 7 inactive	"2-minute reset — try this right now"
Day 14 inactive	"What got in the way?" (genuine curiosity)
Day 30 inactive	"We saved your progress" + incentive

Cancellation Prevention

Timing	Theme
Immediate	"Before you go — what if we adjusted your plan?"
Day 3	"We made some changes you might like"
Day 7	"Your door is always open" (no pressure, warm)

Deliverable 4: Paid Ad Creative

Meta (Facebook/Instagram) — 10 Ad Variations

For each: headline, primary text, description, CTA button text. Mix of:

- Problem-aware (targeting pain points)
- Solution-aware (targeting people searching for NS regulation)
- Testimonial-style
- Educational/curiosity hook
- Quiz funnel driver

Google Ads — 10 Ad Variations

For each: 3 headlines (30 chars each), 2 descriptions (90 chars each). Target keywords:

- “nervous system regulation app”
- “breathwork app”
- “vagus nerve exercises”
- “stress relief app”
- “anxiety relief app”
- “polyvagal theory app”
- “somatic exercises app”
- “HRV improvement”
- “burnout recovery”
- “better than calm app”

TikTok/Reels Scripts — 5 Short-Form Video Concepts

For each: hook (first 3 seconds), script (30–60 seconds), CTA, text overlay suggestions.

#	Topic
1	"The reason meditation doesn't work for you"
2	"Do this when you can't calm down" (physiological sigh demo)
3	"Your nervous system has 5 states — which one are you stuck in?"
4	"I replaced my \$300 Pulsetto with a \$15/mo app"
5	"The 30-second check-in that changed my mornings"

Deliverable 5: Content Marketing Plan

Blog Post Outlines (10 SEO-Targeted Articles)

For each: title, target keyword, meta description, H2 structure, word count target.

1. "What Is Nervous System Regulation? The Complete Guide"
2. "Polyvagal Theory Explained: Understanding Your 5 Nervous System States"
3. "10 Vagus Nerve Exercises You Can Do Anywhere"
4. "Why Meditation Doesn't Work for Everyone (And What to Do Instead)"
5. "The Best Breathwork Techniques for Anxiety, Ranked by Science"
6. "Burnout Recovery: A Nervous System Approach"
7. "How to Improve Your HRV Without a Wearable"
8. "SOS: What to Do When You Can't Calm Down"
9. "Sleep and Your Nervous System: Why You're Wired but Tired"
10. "Emotional Fitness: The Wellness Trend That Actually Works"

Social Media Content Calendar (30 Days)

Platform: Instagram + TikTok. For each day: content type (educational, testimonial, demo, meme, story), topic, caption draft, hashtags.

Deliverable 6: Launch Strategy

1. Pre-Launch (2 Weeks Before)

- Waitlist strategy
- Teaser content plan
- Influencer outreach list (types of creators to target, not specific names)
- Beta tester recruitment

2. Launch Week

- Day-by-day action plan
- PR/media outreach angles
- Launch offer (if any)
- Community activation

3. Post-Launch (First 30 Days)

- Paid ad budget allocation recommendations
- A/B testing priorities
- Key metrics to track (CAC, trial-to-paid conversion, retention)
- Growth lever priorities

4. Referral Program Design

- Mechanics (give X, get Y)
- Viral loop structure
- Copy for referral emails/in-app prompts

Deliverable 7: Legal Copy

1. **Privacy Policy** — standard SaaS, covers: data collection, Stripe billing data, AI processing, analytics, email, cookies
2. **Terms of Service** — standard SaaS subscription, covers: billing, cancellation, acceptable use, liability
3. **Wellness Disclaimer** — prominent. NervSync is NOT therapy, NOT medical advice, NOT a replacement for professional mental health care. Crisis resources: 988 Lifeline, Crisis Text Line

Include placeholders for company name (**ARI Solutions Inc.**), address, and contact email where needed.

Format Requirements

- All copy should be **production-ready** (not drafts — write final copy)
- Use markdown formatting with clear headers
- For emails: include subject lines, preview text, and full body
- For ads: include all required fields per platform spec
- Maintain the NervSync brand voice throughout: warm, knowledgeable, non-clinical, empowering
- Every customer-facing page must include the wellness disclaimer

Word restrictions: Never use “cure,” “treat,” “diagnose,” or “therapy” when describing what NervSync does. Always use: “regulate,” “support,” “train,” “practice,” “wellness.”

Begin with Deliverable 1 (Brand Messaging Framework) and work through each deliverable sequentially. For each deliverable, confirm completion before moving to the next.
